

Cisco Umbrella

CISCO UMBRELLA PROOF OF VALUE OVERVIEW

This is a fixed engagement that defines a Cisco Umbrella solution Proof of Value (POV). Because Cisco Umbrella is a cloud security platform, you can evaluate the solution in your own environment. POV will include security enforcement and threat intelligence, Umbrella and Investigate. EnterOne will provide guidance to establish this POV, and work with you to define your success criteria.

This POV focuses on demonstrating the value of the Cisco Umbrella solution, which provides insight and visibility of all users on the Internet. As you prepare for your Umbrella POV, our team will help you select success criteria that fit your individual needs, and suggest use cases that you can test to validate the success criteria. This process will demonstrate the value of Umbrella including:

- Breach Protection and Intelligence to uncover attacks earlier
- Ease of deployment/reliability
- Real-time reporting
- API based integration with your existing security products
- Decentralized enterprise/device coverage
- Umbrella Investigate

The POV will include the following:

- Demonstrate and Deploy Virtual Appliance in VMWare/Hyper-V/KVM or on cloud - AWS, Azure or GCP
- Local DNS Forwarding and reroute DNS
- Sites and Internal Network with Active Directory Integration
- Roaming Client Setup and capability demonstration with AnyConnect.
- Policies with Intelligent Proxy, IP Layer Enforcement, File Inspection, etc.

Cisco Umbrella

ENGAGEMENT SCOPE

- Up to 3-days of remote support
- EnterOne's proven method of Knowledge and Skill transfer enables our customers to install and maintain their Cisco Umbrella Infrastructure, easily and effectively.
- White board session on workflow of Cisco Umbrella including designing, building and utilizing the most from proposed solution
- Upon completing POV, you will have immediate visibility to Internet activity across every network and all devices pointing to Cisco Umbrella service.
- With Cisco Umbrella Investigate, Cisco's global threat intelligence solution, you can research domain names, IP addresses, ASNs, file hashes and more.

WHY ENTERONE

EnterOne engineers have delivered many deployments, with consistently high customer satisfaction scores across all of Cisco's architectural solutions. EnterOne's 9-step professional blueprint is the methodology used to drive successful projects to completion. EnterOne is a Cisco MINT and DSI Partner and a Platinum Learning Partner engaged with driving Cisco learning and deployment services for highly integrated solutions.
